U.S. Water

Services for Industrial Clients

U.S. Water's Industrial Group is a renowned leader in delivering operations & maintenance (O&M) services, with a specialized focus on water and wastewater facilities catering to industrial clients.

We specialize in the efficient operation and maintenance of industrial treatment facilities of all sizes and complexities. Our team of licensed treatment plant operators, skilled maintenance technicians, expert technical specialists, and experienced managers works together to deliver comprehensive support tailored to each client's operational needs. Our Process Control & Monitoring (PC&M®) platform supports data-driven decisions by helping industrial clients track treatment performance, identify trends, and optimize operations.

- **Compliance and laboratory management**

Clients

- **Industrial**
- **Landfill leachate**
- **Pharmaceutical**
- **Semiconductor**
- **Chemical**
- **Pulp & paper**
- **Food & beverage**

Why Work With U.S. Water's Industrial Group?

EXPERT TECHNICAL SUPPORT GROUP: Expert-level treatment plant operators are available 24/7 to support on-site teams with training, process control, O&M Manual preparation, and preventative maintenance plans. Most members of our technical support team have more than 35 years of hands-on experience in treatment plant operations.

SELF-PERFORMING MAINTENANCE TEAM: Our in-house team of more than 45 skilled tradespeople supports projects nationwide, providing maintenance; mechanical, electrical, and controls troubleshooting; corrective repairs; and upgrades for industrial treatment systems.

PROPRIETARY PROCESS CONTROL & MONITORING (PC&M®) SYSTEM: Our web-based platform collects and monitors operating parameters tailored to each treatment system. Instant feedback and customized reports support informed decisions, reduce manual reporting, and improve operational efficiency.

READILY AVAILABLE STAFF RESOURCES: Highly trained operators licensed across multiple states and disciplines, experienced maintenance technicians, and industry subject matter experts provide flexible support for operational needs, with engineering assistance available as needed.

COMMITTED TO SAFETY: Safety is our top priority at U.S. Water. Our comprehensive safety program emphasizes training, hazard identification, and incident prevention to protect employees, clients, and other stakeholders while promoting safe practices at every project site.

INNOVATIVE TOOLS: We use complementary tools to support, operations, including SDS Tracker for safety data sheet access, MPulse for computerized maintenance management, and Predictive Index to inform hiring and team development. Clients benefit from improved operational performance and greater efficiency.
